EXPERIMENT 5

NAME: SHASMEEN SYED ROLL NO.: 240701492

Task Analysis

Task Analysis is the process of breaking down a user's interactions with a system into smaller, manageable steps to understand how users achieve their goals. It helps in identifying user needs, pain points, and areas for improvement.

Key Aspects of Task Analysis:

- Understanding what tasks users perform.
- Identifying the sequence of actions required to complete a task.
- Analyzing user pain points and inefficiencies.
- Defining requirements to improve the user experience.

Task analysis helps designers:

- Understand **user behavior**
- Identify **difficult steps**
- Improve **system design**
- Reduce **user errors**

User Flow

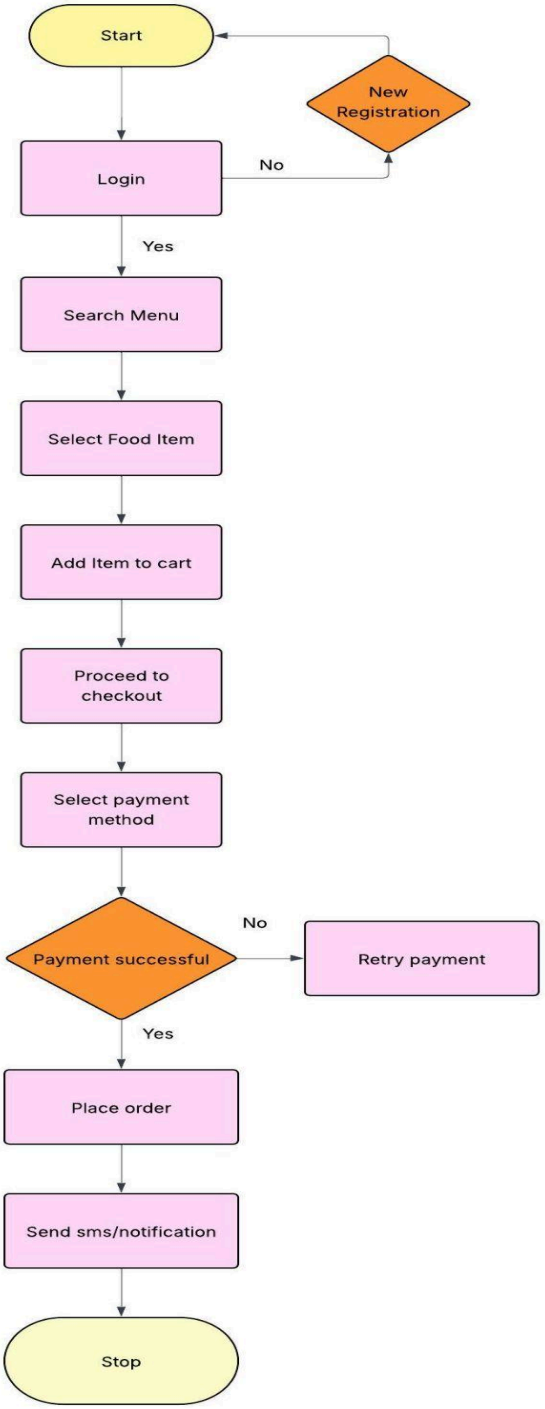
User Flow is a visual representation of how users navigate through an application to complete a specific goal. It shows the steps users take from the entry point to the final action.

Key Aspects of User Flow:

- Represents decision-making paths (e.g., what happens if a user cancels a form?).
- Maps different navigation possibilities (e.g., alternative ways to reach the goal).
- Shows how users move between screens.

User Flow for a Food delivery app:

Start—--> Login/Register—->Search Menu—-->Select Food Item—---> Add Item to cart—---->Proceed to checkout—-->Enter Address—-----> Select payment method—---->Place order—-->Send reminder—-->Delivery



Step 1: Start

- The platform is presented to the user
- The user is presented with sign-in options

Step 2: Login/Register

- The user logs in to their account.
- New users register

Step 3: Search Menu

- The menu is displayed, prompting the user to choose.

Step 4: Select Food Item

- The user picks a food item to be delivered

Step 5: Add to Cart

- If the user adds a product to the cart, they proceed to payment. If they do not add an item, they can continue browsing.

Step 6: Payment Process

- If the user wants to proceed, they choose a payment method. User can do online payment or Cash On Delivery(COD)

Step 7: Payment Confirmation

- If the user chooses online payment, the system verifies the transaction and a confirmation message is displayed.

Step 8:Order Confirmation

- A summary of the order is displayed.

Step 9: End of Process

- The purchase process is completed.
